Objective

Full Stack Developer with extensive experience building scalable web applications using Laravel, React, Angular, and modern web technologies. Proven track record of delivering high-impact features, optimizing system performance, and modernizing legacy applications. Skilled in API development, database management, and leading small teams to deliver efficient, maintainable solutions.

Experience

Airlinometrics | Full Stack Developer

June 2018 – Mar 2026

- **Engineered and delivered** key application modules adopted by 80%+ of customers
- Led ongoing maintenance and enhancement of the core web application
- Improved report generation performance by up to 50%
- Refactored a legacy system into a modern **Laravel + React** architecture
- Designed and implemented a visual workflow platform (klipboard.biz) using Angular and Codelgniter
- **Developed and implemented** a web-based sales deal tracking and scoring application to support business decision-making
- **Engineered** a web-based AI-powered assistant using Laravel, React, and OpenAI to improve consultant productivity
- Implemented automation/agentic functionality to streamline workflows
- Designed and maintained **CI/CD pipelines** for reliable and efficient deployments
- Implemented and managed AWS S3 storage for BSP HOT file processing
- Deployed and managed applications using **Docker**
- **Enhanced and supported** a Java-based system for BSP HOT file processing
- Improved processing reliability and efficiency for airline data workflows
- Collaborated directly with stakeholders and leadership to align technical solutions with business needs
- Produced clean, scalable, and maintainable code across projects

Trackerteer | PHP Developer

Oct 2014 – June 2018

- Maintained and enhanced web applications to ensure reliability and performance
- Designed and developed an accounting software system using Codelgniter
- Led and managed a small development team, coordinating tasks and ensuring timely delivery
- Contributed to backend development, debugging, and system improvements
- Contributed to the development of a social media application for pets, including feature implementation and system enhancements

Skills

- **Backend:** PHP (Laravel, CodeIgniter), Java, Python
- **Frontend:** React.js, Angular, Tailwind CSS, Bootstrap
- **AI & Integrations:** OpenAI API, Agentic/Automation Systems
- **CMS Platforms:** WordPress, Shopify
- **Databases & Caching:** MySQL, PostgreSQL, MongoDB, Redis
- **Cloud & Storage:** AWS S3
- **DevOps & Deployment:** CI/CD, Docker, Git
- **Version Control Platforms:** GitHub, Bitbucket
- **Tools & Collaboration:** Jira, Confluence
- **Queue & Processing:** Laravel Horizon

Professional & Other Skills

- Team Leadership & Mentorship (managed small team)
- Stakeholder Communication & Collaboration
- System Design & Architecture
- Performance Optimization & Scalability
- Problem Solving & Debugging
- Agile/Scrum Development
- Code Quality & Best Practices

School & Academics

- System Plus College Foundation (2011 – 2015)
- Bachelor of Computer Science
